MARVELLOUS

Where flamboyant class reigns

Introducing
an eclectic
design
palette

MAMA LAMINATE is a pioneer brand in the laminate industry. We have designed a wide range of laminates that add a layer of stylish elegance to decors.

With every design, texture and shade, these laminates offer a pristine glow to spaces. Our pastel collection is a soothing treat for the eyes.

Resistance To Cracking	Not Worse Than 4	✓
Resistance To Scratching	2N (Minimum)	✓
Resistance To Staining	Not Worse Than 5	✓
Resistance To Color Change (Wool Standards)		
• In Xenon Arc Light	Not Worse Than 6	✓
• In Enclosed Carbon Arc Light	Not Worse Than 5	✓
Resistance To Cigarette Burns	Not Worse Than 3	✓
Resistance To Steam	Not Worse Than 4	✓
Appearance	Free From Foreign Particles	✓

INSTRUCTIONS

Instructions for Laying HPL Laminate Sheets:

- Ensure that the surface of the plywood and laminates is clean, dry, leveled, and free of oil, moisture, dust, or synthetic particles.
- Use white PVA adhesive only, and apply a double layer of adhesive on the edge (minimum 3-4 inches) of both surfaces.
- Stir the adhesive before use and apply sufficient adhesive on both surfaces to be bonded. Avoid adding water to the adhesive as it weakens the bond.
- Once the adhesive becomes tacky in nature (usually takes 5-10 minutes depending on atmospheric conditions), accurately align and place the laminate on the surface.
- Apply sufficient bonding procedure to ensure intimate contact over the entire area without damaging the assembly.
- Use pinch rollers or heavy weighted rollers to remove air bubbles. Apply uniform pressure on all sides until the adhesive is dried (12-18 hours depending on atmospheric conditions).
- In the rainy season, use hot spray or forced air drying to prevent moisture from condensing on the surface during drying (known as "blushing").
- Limit the maximum sheet size used for vertical field application to 610x2440 mm (2x8 ft.).
- Maintain uniform pressure on all sides if laminate is pasted vertically.
- To avoid stress cracking, avoid making cutouts with sharp corners and rough edges.
- Maintain a minimum gap of 2 mm between two laminates while pasting side by side.
- Lay the laminate sheet on a flat surface between 2 plywood sheets for at least 48 hours due to transportation limitations.

APPLICATIONS

These laminates add a sleek and modern touch to kitchen cabinets and countertops.

The durability and style of our laminates make them perfect for commercial spaces.

The hygienic and easy-to-clean properties of our laminates make them an excellent choice for healthcare settings.

Furniture can look chic and durable with the addition of our laminates.

Hospitality spaces can be easily customized with the use of our laminates, requiring minimal maintenance.
